## Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not currently have hearing aid compatibility technical standards have clear and effective disclosure that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

## Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? Yes

Website address: [http://www.stratanetworks.com/images/stories/PhonePricingDetails\\_Web\\_12.5.11.pdf](http://www.stratanetworks.com/images/stories/PhonePricingDetails_Web_12.5.11.pdf)

Explain:

## Consumer Outreach

Describe consumer outreach efforts in the past 12 months: The Filer has instructed its sales staff about the availability of HAC phone models, and it has signs in each store advertising the availability of HAC devices. The Filer's sales staff is aware of the HAC-compliant issue and has been trained to respond to customer inquiries regarding HAC-compliant phones. The Filer also has wireless industry pamphlets available that customers can take home regarding information about the Commission's HAC requirements and HAC rating system. In addition, both hearing-impaired and non-hearing-impaired customers are permitted to test phones in retail stores. Furthermore, the Filer has a policy which allows customers (whether hearing-impaired or not) to test handsets and service without commitment for up to two weeks. If the customer is not satisfied, the customer may return the handset free of charge (assuming that it has not been damaged) at the end of the two week trial period.

## Methodology for Functionality Levels

- 1) Basic Phones: entry level devices that are offered for low cost or free.
- 2) Feature Phones: devices with more advanced features and capabilities.
- 3) Smartphones: devices that run complete operating system software as a platform for application developers.
- 4) Android Phones: Smartphones with an advanced operating system.
